

How to Connect with Attendees

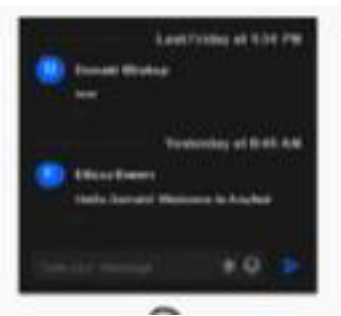

There are various methods for the Exhibitor to connect with Attendees

Exhibitor Profile Page

Social links

Social Links are provided which when selected will open a new window connecting the attendee with the exhibitor's specific social media page. Currently the following are supported: Facebook, Twitter, Instagram, linkedIn, and You Tube.

Group Chat Feature

A chat window can be utilized allowing the attendee to correspond with the Exhibitor. This is considered a channel, so no private conversations can be held. See *"How to use the Chat Feature to speak with an attendee."*

Representative Contacts

Up to four (4) Exhibitors can display their names and emails so attendees can contact them.

Drop a Business Card Button

This button can be utilized which allows the attendee to send their contact information to the exhibitor Registration data center. The Exhibitor will receive their information on the Exhibitor Dashboard Report.

Networking Tool

Exhibitors can choose the Networking option from the upper Navigation Bar to open a new window displaying the networking environment. This environment allows the exhibitor to chat directly 1:1 with attendees as well as schedule meetings. Exhibitors can request up to 10 PENDING meetings at one time. Once a meeting is accepted or declined, the exhibitor is able to request additional meetings. See *"How the Networking Tool works."*
